HOW TO LIGHT THE KENY STOVE

Do not lean over stove while lighting

1. Pull out Snuffer Control. (Top Knob).
2. Slide Temperature Control to ON.
3. Apply lighted match to stack.
4. Slide Temperature Control to adjust flame.

TO EXTINGUISH

1. Slide Temperature Control to OFF.
2. Wait 10-15 seconds.
3. Push in Snuffer Control.

TIPS

1. Do not refuel stove while it is hot. Cool stove 10 minutes before refueling or storing.
2. Do not overfill—use 4 oz. max. of Denatured Alcohol.
3. Do not use in confined area. Provide plenty of ventilation.
4. Do not lean over stove while lighting.
5. Use CAUTION handling hot stove.
6. Do not drop matches into chimney.
7. Do not leave fuel container near stove.
8. Wipe up all spills before lighting stove.
